Beachcraft

A MISSION TO BUILD
HOMES THAT ARE ELEGANT
IN EXECUTION AND
ENDURE THE TEST OF TIME

Beachcraft is recognized for its expertise in building homes that withstand the harsh marine environment. They create timeless homes with a disciplined approach and project controls that provide certainty and comfort for the client. By focusing on Manhattan Beach, they know how to overcome the challenges of building in a prestigious, highly regulated, dense beach community. This knowledge means that premier architects and designers trust them to deliver for their clients.

Building and remodeling homes in Los Angeles since 2003, Beachcraft's core values of honesty, integrity, and reliability in construction mean that the best for the client is always front and center. The stellar team can efficiently problem-solve, even in the most challenging situations, and responds quickly by giving clear expectations and listening to clients.

As Grant Kirkpatrick, Founding Partner, KAA Design says, "To demonstrate Beachcraft's response rate, a prospective client and I will randomly call Shawn Nelson. Like clockwork, he either picks up immediately or calls back within five minutes."

Beachcraft, 124 Center Street, 1st Floor,
El Segundo, CA 90245, 310.802.1932,
